Professional Summary

B.Tech Computer Science & Engineering student with strong foundations in Java, JavaScript, Python, OOP, and full stack web development. Experienced in building scalable web and mobile applications, and database-driven systems. Comfortable with Git-based workflows and using AI coding assistants responsibly to improve productivity and code quality.

Technical Skills

Languages: Java, JavaScript, Python, C
Core CS: OOPs, Data Structures, DBMS, SDLC
Frontend: HTML, CSS, React.js, Next.js, React Native (Expo), Flutter
Backend: Node.js, Express.js, REST APIs
Databases: PostgreSQL, Supabase, SQLite, SQL
Tools: Git, Vercel, Copilot, Codex

Education

B.Tech — Computer Science & Engineering	2022–2026
Supreme Knowledge Foundation Group of Institutions (MAKAUT)	CGPA: 7.35
Class XII — WBCHSE	2022
77.2%	
Class X — WBBSE	2020
69.0%	

Projects

Trashium — Incentivized Waste Management Platform (Final Year Project) 📄 GitHub · 📺 Live Demo

- Led a project team to develop an incentivized waste-recycling platform using Next.js 16 (App Router), React 19, and Supabase.
- Engineered a nightly ML pricing model (Linear Regression & Random Forest in Python) to forecast recyclables pricing.
- Built interactive crew route optimization maps using Leaflet and a 20-tier gamification system with streak multipliers.

VetanFlow — Role-based Payroll Operations Platform 📄 GitHub · 📺 Live Demo

- Developed a full-stack payroll operations platform with React 19, Express 5, and PostgreSQL/Supabase.
- Designed a robust multi-role workflow (Owner, Admin, HR, Finance, Manager, Employee) with strict RLS policies.
- Built month-locking guards to prevent data drift and database-level immutability rules for finalized payroll runs.

RestaurantPOS — Offline-first Point of Sale App 📄 GitHub · 📱 APK Release

- Built a high-performance offline Point of Sale tablet application using React Native, Expo SDK 57, and SQLite.
- Implemented table floor-plan management, menu category routing, discount calculation, and cart billing workflows.
- Engineered an 80mm thermal receipt print layout featuring GST registration and tax split calculation.

Internship Experience

Summer Intern — Jadavpur University 2024 🏆 Certificate

- Worked on system design and development as part of a team project, contributing to real-world problem-solving and implementation.
- Gained hands-on experience in software development workflows, debugging, and collaborative development practices.
- Participated in technical presentations and project demonstrations; awarded Grade A.

Achievements

Smart India Hackathon — National Finalist 2023 🏆 Certificate

- Developed a full-stack platform to route civic issues to government authorities, demonstrating end-to-end system design.

NGP-DST Geo Innovation Challenge 2024 🏆 Certificate

- Presented a flood risk management and early warning system at a national-level innovation challenge.

International Seminar Presenter (RTET 2024) 2024 🏆 Certificate

- Presented a research framework on NLP model evaluation at an international seminar.

Additional Information

Languages: English, Hindi, Bengali **Batch:** 2026 Pass-Out
